

Como Criar um Repositório no GitHub (Nova Versão)

1. Clique no “+” no canto superior direito do GitHub e escolha “New repository”.

2. Preencha os dados principais:

- **Owner:** seu nome de usuário.
- **Repository name:** nome do repositório (ex: **imersao-dados-alura**).
- **Description:** (opcional) descreva o que é o projeto.

Create a new repository [Preview](#) [Switch back to classic experience](#)

Repositories contain a project's files and version history. Have a project elsewhere? [Import a repository](#).
Required fields are marked with an asterisk (*).

1 **General**

Owner *  guilhermeonrails / **Repository name ***

✓ imersao-dados-alura is available.

Great repository names are short and memorable. How about [cuddly-pancake?](#)

Description

64 / 350 characters

2 **Configuration**

Choose visibility *
Choose who can see and commit to this repository Public

Start with a template
Templates pre-configure your repository with files. No template

Add README
READMEs can be used as longer descriptions. [About READMEs](#) Off

Add .gitignore
.gitignore tells git which files not to track. [About ignoring files](#) No .gitignore

Add license
Licenses explain how others can use your code. [About licenses](#) No license

[Create repository](#)

3. Não se preocupe com os outros campos do passo 2.

4. Clique em “Create repository”.

Pronto! Seu repositório está
criado. 🚀
